

Amendment One (1)

Performance Work Statement (PWS)

Add Language to PWS at paragraph 9, Trip Rate/Mileage Rate, subpara 9.2:

Add paragraph (c). Included language,

(c) In events where a trip is a “one way trip” inside the 50 mile radius, the contractor shall invoice at the rate quoted per mile for a roundtrip trip. For example, a roundtrip trip is quoted as \$50 for all trips inside 50 miles and the quote is based on \$1.00 per mile; a “one way trip” from the veteran’s home to CW Bill Young VAMC of 25 miles would be calculated as 25 miles x \$1.00 per mile = \$25.

Solicitation Questions and Answers

- 1) Is this SF1449 required to be part of the Proposal in response to this Solicitation?

Response: The front page of the SF1449 should be submitted with the offeror’s proposal.

- 2) Who is the incumbent?

Response: Wheelchair Transport Service of Clearwater, Florida.

- 3) What is the minimum number of vehicles that are required for this contract?

Response: Please refer to the PWS to determine the number of vehicles as the contractor you will need to perform the requirement.

- 4) What percentage of trips are outside of 50 miles?

Response: Please refer to the Price Schedule to determine estimated totals.

- 5) How does the vendor bill for a one way trip in the event that a round trip isn’t taken?

Response: See above PWS amendment.

- 6) Would the program be open to modifying the pricing schedule to charge for each one way trips instead of round trips?

Response: Not at this time. The purpose of roundtrip pricing is to limit the number of invoiced trips for a single veteran. Roundtrip pricing provides a single cost per veteran based on original pickup and final delivery to original pickup location. See PWS, para 9, Trip Rate/Mileage Rate.

7) Can you clarify the Service Contract Act wage determination job classification for drivers? The solicitation has 31290 Bus Driver highlighted. However, the service mirrors the job description of 31290 Shuttle Bus Driver. There is also a pay difference that will affect the budget.

Response: Offerors should determine which Wage Determination Occupation reflects the personnel expected to be used for their proposal submission.
